GT LINE 25

| SYSTEM CHARACTERISTICS

The **Gabit-Terra GT LINE 25** loft-style steel system is a modern construction solution featuring slimline profiles.

It combines the high durability of steel with the minimalist, elegant appearance of profiles with a face width of just 25 mm, making it ideally suited to the requirements of contemporary architecture and loft-style interiors.

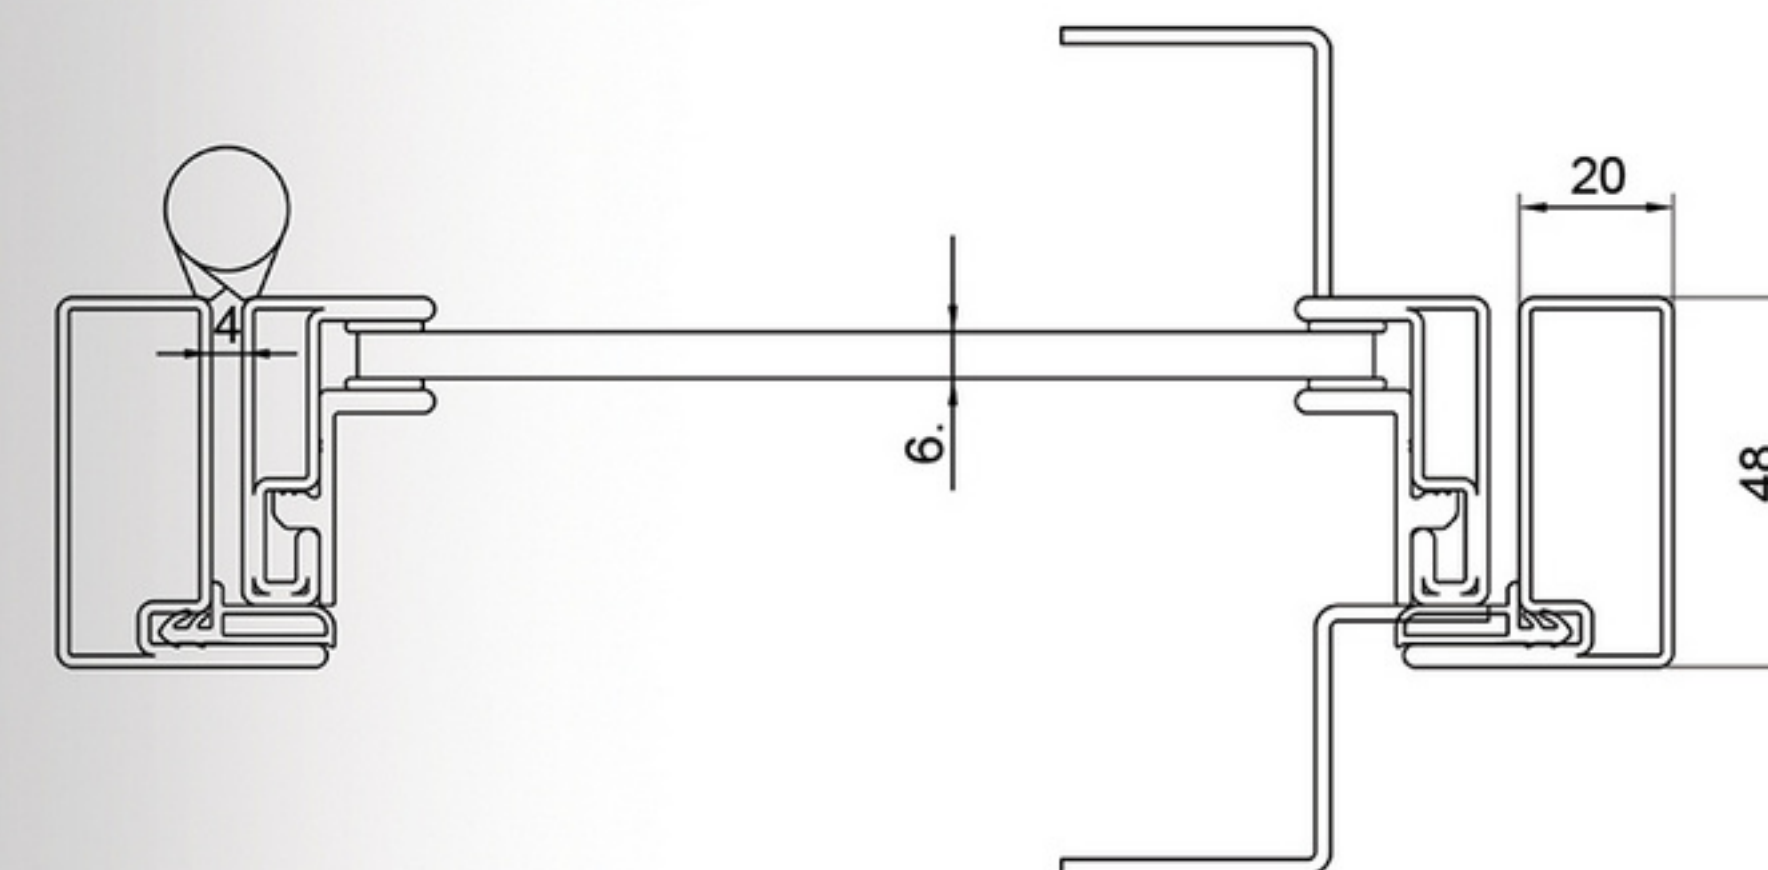

The system provides a perfectly balanced combination of visual lightness, structural strength and stability.

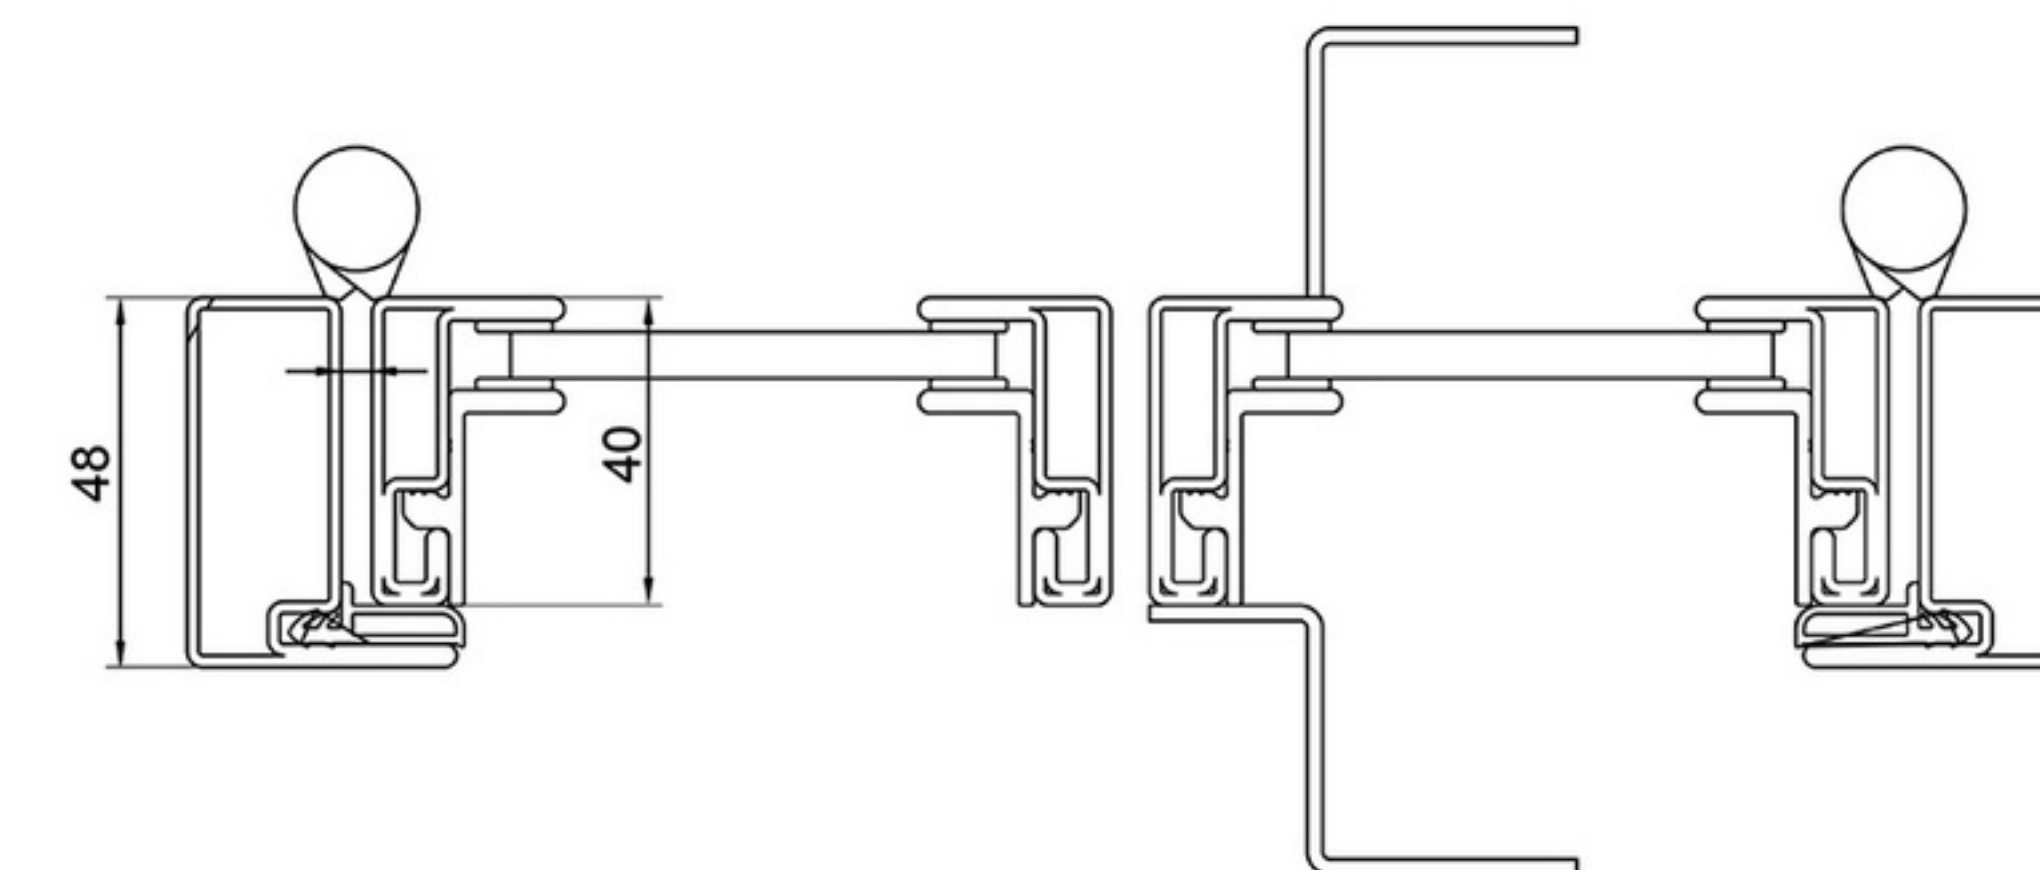

| KEY BENEFITS

- Slimline profiles with a face width of 25 mm give the structures a lightweight, contemporary appearance.
- The use of structural steel ensures excellent rigidity and durability.
- The minimalist profile design is ideally suited to contemporary, industrial and loft-style projects.
- The system is designed for the construction of partition walls, fixed glazing and steel doors in a variety of configurations.
- Matching system components and accessories provide a consistent and functional solution.
